

Cyber Insurance Policy

Safeguarding businesses from cyber threat and digital risk

Cyber threats are now a common everyday business risk, and at rrelentless, we know a cyber incident can happen at any time.

We believe businesses need support in confidently navigating the dynamic digital risks they face. Our holistic, proactive Cyber Insurance Policy enables businesses to not just fix problems, but also to identify and manage them, so that they can prevent and minimise the risk of issues occurring in the first place. That's why this policy offers more than just protection against data breaches, cyber crimes,

fraud, extortion, data or software loss, network and business liability cover.

With access to rradar, a specialist and regulated legal enterprise, included, policyholders can make use of a range of proactive cyber and data security support, advice and risk management solutions under the policy, to manage and support them in identifying exposure gaps and rectifying these matters that, if left or not handled correctly, could potentially increase their risk of experiencing a cyber event.

Key features and benefits:

✓ Comprehensive cover

Supporting SMEs (with a turnover of up to £50m) in managing cyber threats – from phishing, ransomware, malware and other attacks, to employee errors/malicious activity, and lost/stolen devices.

✓ Innovative covers

18 covers as standard to protect against cybercrimes, data privacy and regulations, system damage, media liability and more.

✓ Exclusive access to rradar

Expert legal, regulatory and proactive risk management advice and representation. Specialist, legally privileged advice for policyholders in pre-empting cyber threats.

✓ Any one claim limit

Each section gives cover up to the selected limit for any one claim on the policy. There is no limitation on the number of claims on the policy that can be made in any one period of insurance.

✓ Specialist cyber support for policyholders

Incident crisis helplines, to ransom negotiations and security fixes, IT forensic investigators, data retrieval and recovery services, and post-incident security reviews, to manage and fix a cyber incident.

✓ Claims experience

A streamlined transition from advisory services to representation, delivered by a UK-based team.

Cover includes protection against the following:

Cyber event response

Cyber crime

Privacy and regulatory

Direct and dependent cyber business interruption

System damage

Network security liability

Media liability and defamation

Legal pursuit extension

Proactive services and claims and crisis management from rradar

Prevention is often the best protection, which is why all our cyber insurance policies include access to rradar's services, people, legally privileged advice, and risk management tools. All designed and delivered by rradar's cyber and data experts to help policyholders navigate the risks they face, included as standard, as part of the Cyber Insurance policy.

Proactive support and guidance

Cyber Advisory Service

Unlimited access to a dedicated cyber advisory team to help pinpoint the issues relating to your cyber and data concerns over the phone or by email.

Cyber Risk Management Tools

Unlimited access to rradar's Knowledge Library of cyber and data guidance resource documents and templates. Support to undertake government-backed Cyber Essentials accreditation, access to a Cyber eLearning training platform, cyber risk analysis tool and intelligent legal assistant (mobile app). All written and verified by rradar's qualified team of experts.

Legal and Regulatory Updates

Subscription to the Cyber Threat Briefing newsletter advising on cyber threat trends and early warning of seasonal SME issues, delivered direct to a policyholder's inbox.

Claims and incident response management

Cyber Incident Response Line

Available 24/7, 365 days for reporting and advice during cyber events and emergencies, plus a post incident review and dark web monitoring support.

Legally Privileged Advice

Confidential and protected advice, before, during or after a cyber event, from rradar's UK-based specialist legal, cyber and data experts.

Legal Representation

Full UK-wide legal representation for claims and investigations.
