

The Comprehensive Reserving Platform for the Modern Actuary

Arius is now part of the Akur8 family!

Are your reserving processes not keeping up with the changing times?

Join our 150+ clients in the journey of reserving sophistication.

- Replace risky spreadsheet-based analysis with advanced stochastic modeling and robust deterministic solutions.
- Modernize the reserve analysis process, adding efficiency and reliability throughout.
- Spend less time on repetitive, error-prone tasks and more time really understanding your business.

Speed

Reserve 4X faster

Automate the routine parts of the reserving process.

Adaptability

Reserve with flexibility

Tailor to fit your department's workflow.

Reliability

Reserve with confidence

Minimize the risk of errors that comes with routine manual tasks across multiple users and spreadsheets.

720

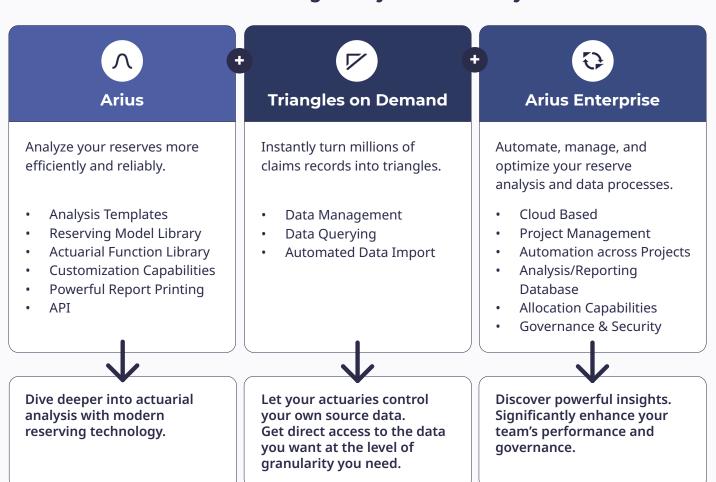

hours saved every quarter

A major insurer replaced their inefficient, error-prone data and spreadsheet preparation with Arius Enterprise, reducing their quarterly pre-analysis prep by 90%.

Discover how we do this

Find the Arius solution set that's right for your team and your business

What makes Arius unique?

Modern technology

- Get customizable reports and exhibits designed by you, managed by the system.
- Have real-time deterministic calculations.
- Run simulations hundreds of times faster than in spreadsheet models.

Ease of use

- Experience a seamless implementation and get started in hours, not weeks.
- Work in your own way with an intuitive, customizable, user-friendly interface.
- Easily parameterize very sophisticated models.

Expertise

- Leverage our industryleading team of actuaries, industry experts, and engineers.
- Get expert support from basic training to a complete redesign of your reserving process.
