

CEC showcases their innovative claims support service designed for Insurance Brokers and their clients at BIBA 2025.

We are pleased to announce that Claims Equilibrium Club (CEC) will be attending the 2025 BIBA Conference in Manchester. You will find us on **Stand A44**. Roger Topping our Managing Director, is looking forward to catching up with our current broker partners together with Christine Thomson, Paul Nicholson and other members of the Loss Adjusting Team.

We hope to introduce our unique claims support proposition to those brokers not already working with us. It really is a unique proposition, so do try to make some time to speak with us and find out why our services change the way that brokers resource claims support in their business. 100% of the assistance is provided by qualified Chartered Loss Adjusters and in the unfortunate event of a claim event arising, they will support and represent you and your clients to achieve the best possible outcome.

Our team will be on hand to explain more on how the CEC service can benefit brokers and clients alike. You will learn more about our service features, the policy types included and how you can use CEC to create a valuable income stream.

We look forward to seeing you all at this year's event.

If you would like to schedule a meeting with one of our team ahead of this year's event please contact us:
