

Broking Manager is growing rapidly around the world

CyberCube's analytics are used by brokers globally to inform cyber risk management and insurance decision making. Since 2024, Broking Manager's global impact includes:

Active usage in
40 countries

Engagement across
100+ markets
worldwide

Broking Manager is powered by an ever-growing dataset of real SME cyber policies:

- Our database of real SME cyber policies grows at **13% per quarter**.
- Non-US SME policies in that database are growing even faster, at **22.5% per quarter**.
- Almost 25% of Broking Manager analyses are non-US today, and this share is **increasing by 1-2 percentage points per year**.
- SME defined as companies with **revenue between \$0 and \$250m**

Wherever your clients are based, **Broking Manager** leverages an expanding pool of real policy and claims experience to benchmark their risk and support confident limit and structure decisions.
