

# Perilfinder™

Fast, flexible, proven: risk intelligence for every decision

Perilfinder™ delivers instant **property-level hazard insights, real-time accumulation visibility**, and easy collaboration tools, helping underwriters, portfolio managers, and risk managers reduce friction, cut decision time, and gain confidence in their view of risk.

## Why Perilfinder

A single pane of glass for address-level risk intelligence, combining instant risk assessment, dynamic geospatial insights, and seamless integration into one intuitive platform.

➤ **Speed & efficiency**  
Rooftop-level geocoding and instant risk scores (red, amber, green).

➤ **One platform**  
Property insights, accumulations, and reporting in one place.

➤ **Fits your workflow**  
API-first design with custom rules and data layers.

➤ **Proven & trusted**  
Used globally by insurers, reinsurers, and financial institutions

### The KatRisk advantage

Distinctive modeling strategy grounded in physical science

Agile framework built for evolving risk landscapes

Client-centric approach focused on real-world decisions

### How to access our solutions

#### KatRisk-Hosted

Hosted on AWS or Azure with API access

#### On-premise or client-

hosted cloud deployment

➤ **Multi-peril view**  
Flood, SCS, wildfire, tropical cyclone wind, and more.

## Tailored to Your Workflow

Perilfinder is delivered as two customizable platforms:

### Perilfinder Insights

Risk intelligence at the property-level through a rooftop-accurate geocoding interface.

- Custom risk scoring (red, amber, green) with your own business rules
- Rich data & imagery (spatial layers, aerial imagery, and StreetView™)
- Advanced risk checks
- Financial precision (e.g., Average Annual Loss)
- Customizable data layers

### Perilfinder Portfolio

Powerful portfolio analysis and management tools for teams managing books of business.

- Portfolio upload & management directly in the platform
- Interactive accumulation mapping
- Custom dashboards and layers tailored to your business
- Upcoming modules for event analysis, dashboard reporting, AI, and more

## Trusted voices, proven outcomes

KatRisk is a global leader in catastrophe risk intelligence and solutions, setting the standard for how organizations assess and manage climate-driven risk. Serving insurance, reinsurance, and financial services organizations globally and supporting clients in over 190 countries, KatRisk delivers forward-looking insight across flood, storm surge, tropical cyclone wind, severe convective storms, and wildfire. Built on transparent methodologies, flexible data architectures, and high-performance computing, KatRisk supports underwriting, portfolio management, and risk strategy with solutions designed to translate complex hazard science into confident, actionable decisions.
